**SOUTHBRIDGE SAVINGS NEW BRANCH COMPLETE**

Worcester, MA-Southbridge Savings Bank Celebrated the grand opening of their new Branch on Gold Star Boulevard, opening in October.

Masiello Construction began work on the new Branch in April of 2006 and despite an extremely rainy spring was completed on time.

The wood frame, masonry veneer structure was designed by DRL Architects of Weymouth, Massachusetts and the NES Group of Taunton served as Preconstruction Consultant.

Southbridge Savings Bank was founded in 1848 and has enjoyed steady growth over their 158 year history.

The New Branch has an internet lobby, streaming financial video, and even free coffee. Although Southbridge Savings is a leader in on line banking, people still want a home town branch as evidenced by the incredible client growth Southbridge Savings has experienced at

BRIEF HISTORY

- Masiello Construction was Founded In 1959
- Incorporated 1963
- John A. Masiello, President & Founder
- Constructed pre-engineered buildings since 1965
- Commercial, Industrial and High Voltage Infrastructure

**NEW HOME FOR BATTERIES UNLIMITED**

Worcester, MA- Batteries Unlimited has moved into their new home at 1000 Grafton Street, built by Masiello Construction Co., Inc.

Owner, Frank Groccia III began Batteries Unlimited in 1990 selling six batteries to a local Aggregate Company, and has

become the Battery Leader for Central Massachusetts. Batteries Unlimited services Truck fleets from New Hampshire to Rhode Island and has built a large and expanding Retail base. Batteries Unlimited sells everything from Watch and Phone Batteries to Large

Marine Grade Industrial Batteries. New product lines will include personal vehicle and light truck accessories.

Batteries Unlimited's building utilizes an American Buildings Company pre-engineered metal building with SS360 Standing Seam Roof and Split Face

## HIGH VOLTAGE WORK CONTINUES

*Shrewsbury, MA*– Masiello Construction continues work at the Logan Avenue Substation performing Civil and Concrete work necessary for the Installation of a 69,000 Volt bus tie, underground duct banks and structural stands for high voltage transformer ties. The project is part of Shrewsbury Municipal Light Department's ongoing reliability upgrades.

J. F. White Contracting of

Framingham, Massachusetts is the Primary Contractor for this project. PLM Engineering of Hopkinton is the Project Engineer.

Masiello is also performing civil and concrete work for J. F. White in Medway, installing two 345,000 Volt breakers in Medway for NStar Corp. The first Breaker has been installed and is undergoing testing. The second breaker will begin shortly.

Portion of new 69 kV Bus Tie at the Logan Substation in Shrewsbury.

## GREEN ENERGY PROJECT NEAR COMPLETION

*Westminster, MA*– Masiello Construction is playing an integral part in the completion of the Landfill Gas to Energy Project at the Fitchburg Landfill. Methane gas is created as trash decomposes and Waste Management of Houston Texas has lead the way in finding a use for this byproduct gas.

Methane is highly volatile and

will be trapped, cleaned and piped to Caterpillar Generators to provide enough electricity to power approximately 700 homes.

Masiello Construction is performing Concrete, Carpentry and miscellaneous interior finishes for the facility.

Masiello Construction has been involved in Power Plant Construction since 1990.

T. V. John & Son of Butler, Wisconsin is the Project Construction Manager.

Waste Management has developed nearly 100 such plants throughout the US.

"We are proud to be part of this ingenious project. It's nice to see Private Industry taking action in addressing the environmental and energy challenges that the world now faces" said John

In the time it took you to read the article to the left, the world consumed over 10,000 barrels of oil (Source- Chevron Corp. Website)

## ENERGY SAVINGS AND YOU

For the typical energy consumer, efforts are more wisely spent in conservation than in pursuing alternative energy generation.

Energy efficient lighting and added insulation are the easiest ways to lower energy bills and help to conserve natural resources.

For more information visit the US Department of Energy Website at:

[www.doe.gov](http://www.doe.gov)

Energy efficient lighting may entitle you to a significant installed cost rebate from your local energy provider. Contact your local electrical utility for further information.

**GOLDWELL OF NEW ENGLAND CONTINUES**

Holliston, MA- Masiello Construction is nearing completion of the Addition and Renovation to Goldwell of New England in Hopping Brook Industrial Park.

Goldwell of New England and their sister company Essential Salon Products, are major wholesale distributors of beauty supplies to Hair Dressers and Salons throughout New England . Their attention to customer service has paid off in their continued growth and market share, these many years.

Masiello Construction constructed the original facility in 1988 and has built numerous subsequent additions and renovations since. The current project is a 10,125 square foot addition, installation of an elevator and transformation of existing warehouse to office and training space.

The building is a flat roof conventional steel structure with exposed aggregate wall panels, pre-manufactured off site.

Construction on the warehouse began in May of 2006 and is now complete. Interior Renovations began in July of 2006 and will be completed shortly.

Goldwell of New England and Essential Salon Products in Holliston, Massachusetts.

*Don't forget to clean your gutters. Now that the leaves have fallen, you should clean gutters and roof drains of leaves and other debris to prevent clogging and ice dams.*

**BARTLETT TREE AWARDS PROJECT TO MASIELLO CONSTRUCTION**

Waltham, MA- Masiello Construction Company is pleased to announce that they have been awarded the construction of a new Facility in Waltham, MA for The F. A. Bartlett Tree Expert Company of Stamford, CT.

The new facility will house Vehicle Storage and Maintenance, Office Support

and Training. Construction is set to begin this winter with an early summer anticipated completion date.

The project will utilize a pre-engineered metal building system and brick veneer. The Roof will be American Buildings Company SS360 Standing Seam Roof. Design is ongoing.

Masiello Construction has built pre-engineered metal buildings since 1965, and is an authorized builder for American Buildings Company of Eufala Alabama.

Pre-engineered buildings now represent over 60% of the low rise commercial and industrial construction market in the United States.

*Planning a pre-engineered metal building project? The American Institute of Steel Construction certifies manufacturers for quality. Always insist upon AISC Category MB Certification, which ensures compliance in design, fabrication, shipping and construction control to the highest industry standards. Also the Metal Building Manufacturers Association monitors compliance of their member organizations.*

Masiello Construction Company, Inc. was founded in 1959 by John A. Masiello (Jack) who continues to serve as the Company President.

The Company moved from its original Shrewsbury Street, Worcester Location to its current address in 1963, the same year in which we formally incorporated.

Masiello Construction is a General Contractor serving Business, Industry and the High Voltage Electrical Markets. We are unusual in this day and age, in that we actually build things. We are not a brief-case contractor or broker. We self perform much of our work in the traditional General Contract manner, in order to maintain quality.

When you are ready to build, we hope that you will consider Masiello Construction Co., Inc. as your General Contractor.

Since 1959

**First Class**
